**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 31 December 2003.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Specifically, Applicant recites the limitation "plastic steel material" in line 1. It is not clear whether or now Applicant means a plastic material or a steel material or a combination of both materials. For the purposes of examination, the Examiner has view the recitation as being alternative (i.e. plastic or steel.) Clarification is required.

Claim 1 recites the limitation "the round groove" in line 6. There is insufficient antecedent basis for this limitation in the claim.

## **CONCLUSION**

### ***Allowable Subject Matter***

Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Claims 2-4 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

The claim 1 recites the limitations of the bearing structure having a hollow cylindrical body and

Art Unit: 3745

an outwardly extended seat whose diameter is larger than the body and has a recess. The body of the bearing structure further has a flange that interacts with a round groove in the rotor shaft of a fan to restrain the rotor shaft and a C-clamp. While prior art such as US Patent Application Publication 2003/0108260 to Chuang, Us Patent 6,926,497 to Lin et al. and US 6,699,020 to Lin all disclose cylindrical bearing structures and, in particular, Chuang and Lin et al. disclose bearing structures having seats similar to the claimed structure and Lin discloses the rotor shaft having a C-clamp insert to limit the upward movement of the shaft, know of the references disclose a flange interacting with a round groove on the rotor shaft. Further, While Chuang does show a similar interaction in Figure 5, there would be no motivation to modify the structure to include a C-clamp sine the interaction of the rim 12 with the groove already serves that purpose.
